SUMMARY

I am a quick learner who embraces challenges with enthusiasm, always seeking opportunities to expand my knowledge and grow both personally and professionally.

In my current role, I develop test specifications for system functionalities, set up test environments, analyse and track problems throughout the project lifecycle and help train new colleagues. I also have experience as a Scrum Master, where I facilitated the agile development process and improved the team's collaboration and performance.

I enjoy working in a diverse and dynamic team, where I can learn from others and contribute to the company's success.
